Use
<<IExpressionNode>>
Interface
+ accept(visitor)
<<IExpressionVisitor>>
Interface
+ visit(node: BinaryExpressionNode)
+ visit(node: NegationExpressionNode)
+ visit(node: TextFilterNode)
+ visit(node: TrackFilterNode)
+ visit(node: TemporalFilterNode)
+ visit(node: FreeFilterNode)
NegationExpressionNode
- expression:
ExpressionNode
TrackFilterNode
- track: Integer
BinaryExpressionNode
- type: BinaryOperation
- left: ExpressionNode
- right: ExpressionNode
TemporalFilterNode
- from: Integer
- to: Integer
TextFilterNode
- type: FilterField
- value: String
FreeFilterNode
- expression: String
